

# SOLAR POWERED KEYBOARD FOLIO

FOR iPad Air 2®

The wait is over. We are proud to introduce the world's first Solar Powered Wireless Keyboard & Folio for iPad Air 2.

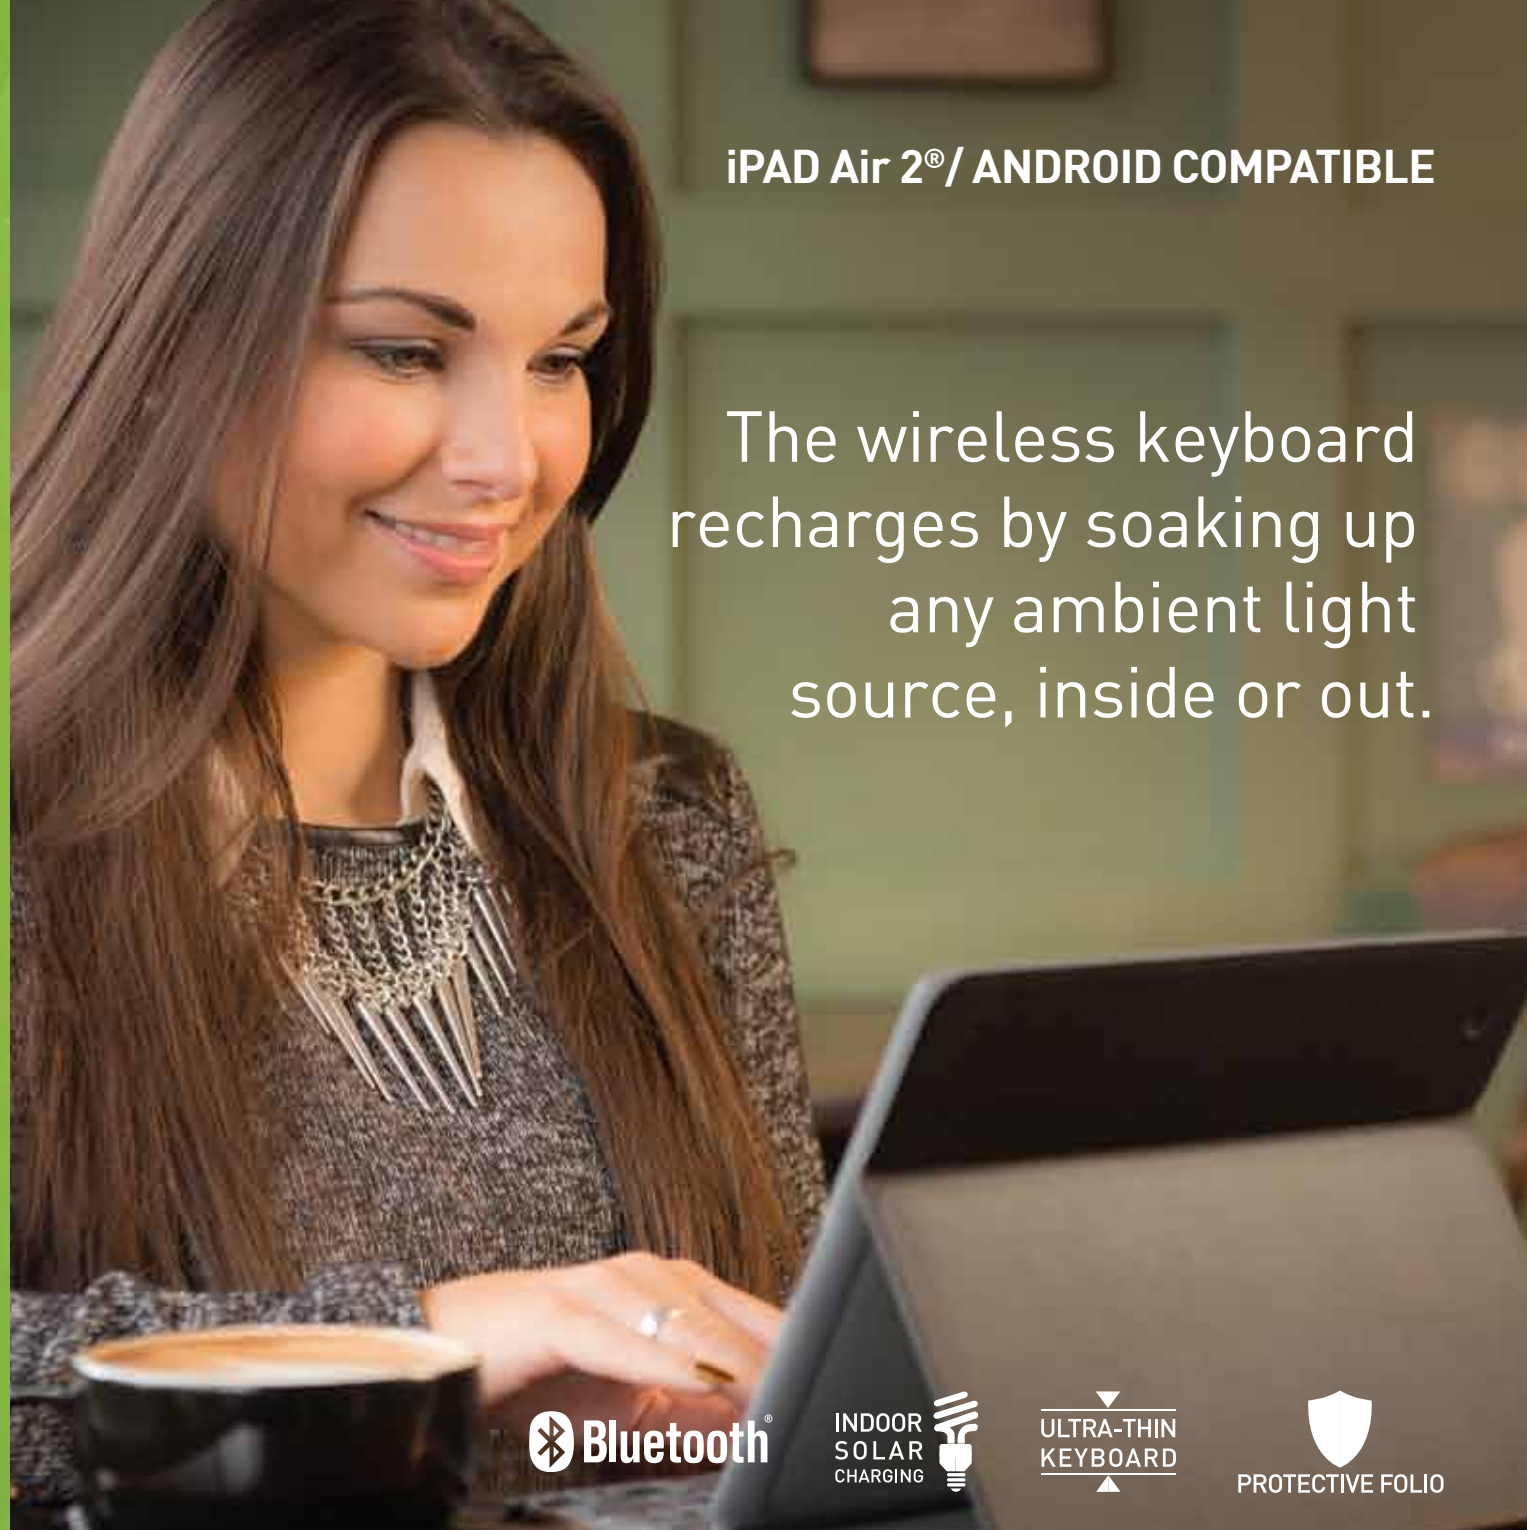

Charging with ambient light means there is no need to change batteries or revert to a mains powered charger.

With GCell any visible light source becomes an energy source. We have revolutionised solar technology and put it straight into the hands of the tablet generation.

iPAD Air 2® / ANDROID COMPATIBLE

The wireless keyboard  
recharges by soaking up  
any ambient light  
source, inside or out.

The GCell Solar Powered Keyboard Folio allows users to type with an iPad from the home, the office or on a daily commute without the need to change batteries or revert to a mains powered charger.

## ▶ Product Features

### ▶ Portability

Offers added functionality to the iPad, with increased freedom of use and no restrictions of trailing wires.

### ▶ Ecological

This eco-friendly consumer product removes consumer concerns with the responsible disposal of batteries.

### ▶ Tactile feel

With a high-quality scissor-key structure every key stroke gives tactile feedback for an improved typing experience.

### ▶ Detachable

Physically detach the keyboard from the folio for use and pairing with compatible iOS or Android devices and smartphones.

### ▶ Hot Keys

Hot Keys for iPad allow the user to perform repeated key functions quickly and conveniently.

### ▶ Convenience

The rechargeable batteries allow the user to type with their iPad from the comfort of their home or office without needing to change batteries or revert to a mains operated charger.

### ▶ Contemporary design

A thinner streamlined and lightweight profile, popular with users of wireless keyboards.
